

Product sheet | **365 Enhanced Bank Reconciliation**
Extension for Microsoft Dynamics **365 Business Central**

Harmonize your ERP accounts with your bank accounts

Bank reconciliation is a very important process for any company, no matter how large, medium or small. The objective of 365 Enhanced Bank Reconciliation is for your business to comply with "Norma 43" with guarantees.

The objective of 365 Enhanced Bank Reconciliation is that you can perform bank reconciliation in an easier and more intuitive way than with the standard bank reconciliation provided by 365 Business Central.

The extension adds two more fields to identify the movements loaded from the N43 file.

These fields are "Inform. 2 "and" Inform. 3 ", which will help you have greater control, detail and information about the movements that the bank is providing you.

With the **365 Enhanced Bank Reconciliation** extension you will know and better manage the control of the financial resources of your company

Easy to use

Once you have downloaded the N43 file from your bank's website, it is very easy to import it into 365 Business Central.

Identification

Detailed and in-depth information on the statements uploaded according to the types of banking operations (general and private).

Automatic or manual

The process begins with the launch of automatic reconciliation, but you can choose to do it manually or even automatically and manually.
